Identity Governance and Administration (IGA) that Works for You

Effectively securing and managing your ever-expanding digital identities is crucial to ensuring compliance and safeguarding your data. The Netwrix IGA solution helps you implement a zero-trust approach to reduce risk, streamline compliance, and increase productivity. Tailored to match organizational needs, the solution adapts as requirements mature.

EASE COMPLIANCE

Secure access to systems, applications, and data as required by regulations and provide proof of your compliance on demand. Empower data and application owners to regularly review access rights and approve or deny access requests.

ELEVATE SECURITY

Mitigate risk and bolster your security defenses with identity management automation and continuous monitoring capabilities, ensuring that access permissions are meticulously managed.
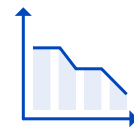

INCREASE PRODUCTIVITY

Increase productivity with consistent, automated provisioning, reprovisioning, and de-provisioning of user access to systems, applications, and data. Empower business users to manage and govern access, reducing the workload of IT teams.

CUSTOMER FEEDBACK

"Netwrix enables us to both easily get ready for a security review and pass it because we can show up-to-date data about access permissions of the employees. That's priceless!"

Sébastien Briffault,
Head of Information Systems Security at ADIS Assurances

Identity Governance and Administration (IGA) that Works for You

Key features

STREAMLINED USER LIFECYCLE MANAGEMENT

Automate provisioning, reprovisioning, and de-provisioning processes to ensure immediate productivity for new hires, prevent unauthorized access during role changes, and promptly revoke access for departing employees.

GROUP AND GROUP MEMBERSHIP CONTROL

Empower business owners to manage the membership and properties of their groups. Ensure that no group outlives its purpose with powerful lifecycle management policies and periodic attestation.

FLEXIBLE AND SCALABLE

The solution is tailored to match your organization's needs and adapts as your requirements mature. It is highly customizable, so it easily adapts to fit your IT environment and operating practices.

ACCESS REQUEST AND APPROVAL WORKFLOWS

Enable users to request access to systems, applications, and data, and owners to approve or deny those requests, all through a friendly user interface. Users can also perform common tasks on their mobile devices.

ACCESS CERTIFICATION

Be confident that you are in compliance with regulations by enabling data, application, and system owners to regularly certify that users have only the access they currently need.

MODULAR AND INTEGRATED

Leverage previous investments by integrating Netwrix solutions with your existing tools via an extensive array of APIs and connectors.

CONSISTENT POLICY APPLICATION

Automate the application of access policies across the organization with rules that apply policy consistently to all identities as required.

REPORTING AND ANALYTICS

With an extensive set of customizable reports and a library of the reports you use most often, you can maintain oversight of your identity governance and easily access the supporting data you need to prove compliance.

OUTSTANDING SUPPORT

Have your issues promptly resolved by first-class technical support with a 97% satisfaction rate.
