

Netwrix Netwrix Threat Manager (formerly StealthDEFEND)

Detect advanced attacks in progress and shut them down in a flash

Protect your critical Active Directory, Entra ID, and file system data by catching even highly sophisticated attacks in their early stages, responding automatically, and quickly getting the full insight required to recover and strengthen your defenses.

SPOT THREATS BEFORE THEY TURN INTO BREACHES

Detect complex attacks and insider threats in progress using machine learning and user behavior analytics.

RESPOND FASTER THAN HUMANLY POSSIBLE

Thwart known attack techniques at lighting speed by leveraging a catalog of automated response actions.

SIMPLIFY INVESTIGATION AND RECOVERY

Get comprehensive insight into incidents across your hybrid identity infrastructure and file systems to enable prompt recovery and inform your defense strategy.

CUSTOMER FEEDBACK

“StealthDEFEND is the most effective real time defender I have ever seen.”

Network Engineer in the Transportation Industry

Key Features of Netwrix Threat Manager

UNCOVER SOPHISTICATED THREATS IN PROGRESS

Promptly detect use of techniques indicative of ransomware, Golden Ticket, DCShadow, Kerberoasting and many other known attacks, thanks to advanced machine learning.

CUT THROUGH THE NOISE AND ZERO IN ON WHAT MATTERS TO YOU

Keep your IT teams laser-focused on true threats by tailoring threat parameters, rules and logic to your organization's specific needs and easily defining new threats relevant to your business or industry.

STAY ON TOP OF THREATS IN REAL TIME

Know immediately about suspicious activity in your environment with email or mobile alerts, and automatically send threat data to ServiceNow, Slack, Microsoft Teams or any popular SIEM.

CATCH INSIDER MISTAKES AND PRIVILEGE ABUSE WITH UBA

Avoid costly breaches and downtime by building an accurate baseline of normal behavior for each user and spotting any unusual data access, process execution or other suspicious activity.

BLOCK OR ENTRAP HACKERS AUTOMATICALLY

Shut down threats in an instant using preconfigured response actions, or lure attackers into a honeypot for study. You can even integrate Threat Manager with your own business processes using PowerShell or webhook facilities.

SPEED INVESTIGATIONS AND STRENGTHEN YOUR SECURITY POSTURE

Easily review the entire timeline of events related to an incident to simplify recovery, enable accurate reporting and inform cybersecurity improvement efforts.

HOW IS NETWRIX THREAT MANAGER?

EFFECTIVE

Noisy, incomplete and cryptic native logs are no match for modern threats. Netwrix Threat Manager delivers the comprehensive, consolidated threat intelligence required to proactively spot and block today's sophisticated attacks.

COMPREHENSIVE

Netwrix Threat Manager is a real-time threat detection and response solution purpose-built to protect your hybrid identity environment and file system data, targeting the most common breach vectors.

SECURE

Keep access to the product console under strict control by requiring multifactor authentication (MFA) using any one-time password solution that supports RADIUS.
